

I am writing in reference to K-LOVE radio which I listen to via an FM translator. If you expand Low Power FM in such a way as to give them priority over current FM translator service I will lose my ability to listen to this valuable radio station. K-LOVE is very important to the Midland community and is strongly supported here. Many here enjoy listening to their positive, encouraging music. The service they offer is unique and I am very concerned about losing the ability to listen to this station. I strongly urge you to not expand Low Power FM. Many of today's radio stations all "sound alike", but what K-LOVE has to offer is positive for families and this type of programming is difficult to come by. Please don't allow the "same old thing" to replace such a valuable service to our community.

Sincerely,  
Kitty Binek
